- KBM 8.3 Upgrade Assistance
- Template Development
- Data Conversions
- HL7 Interface
- Custom Programming and Development
- Implementation and Training
- Go Live Support
- Post-Go Live Support and Maintenance
- Custom Reports Programming
- Upgrade Technical Services

Our Products

Our suite of solutions are aimed at increasing productivity. For over 10 years we've helped hundreds of organizations implement, optimize, and maintain their EHR and PM systems. During this time we've identified some of their key pain points, and embarked on creating innovative, sustainable solutions. We constantly review our Clients' biggest challenges, and continue to develop sustainable, upgradeable solutions. Throughout our development efforts, we strive to meet two key requirements - configurability and upgradeability. Our products are designed to be cost effectively maintained and supported, as well as easily managed through any KBM upgrade.

DYNAMIC LAB TEMPLATE

Build lab orders the way you want to see them, easily at a fraction of the cost.

DYNAMIC DIAGNOSTIC TEMPLATE

Quickly order diagnostic tests without the need to search through categories.

DYNAMIC FLOWSHEET

Quickly bridge content gap – build the data you want to collect, easily and at a fraction of the cost of custom development.

PATIENT REMINDERS

Meet Meaningful Use patient reminder requirements automatically.

RAPID TRAINING MODULE

Train your staff quickly, efficiently, and monitor their progress real time.

CUSTOM PHYSICAL EXAM

Quickly bridge content gap – quickly build your physical exam using your own terms and language.

CUSTOM LETTER BUILDER

Puts letter building in the end user's hands – quickly build any custom letter on the fly.

FUTURE TASKING TEMPLATE

Easily track and be reminded of follow ups and tasks to be completed for your patients.

SUPERBILL

Quickly and easily review and edit encounter charges.

CUSTOM RESULTING TEMPLATE

Easily enter custom in-office lab and diagnostic results and upload to the Orders Module.
